ABOUT ME

I define myself as an enthusiastic creative mind and architect. I am a team player thriving in a dynamic working environment, focusing on functional and efficient designs. My portfolio ranges from designing full-size buildings, down to illustrative business cards, through in-house furniture. I like to mock-up new ideas and finally prepare them professionally in 2D, 3D or for web content. My professional experiences taught me to deliver quality work on time while keeping a steady communication channel within diverse teams.

EDUCATION

2017 - Present

WEB & INTERACTIVE DESIGN ASSOCIATE IN SCIENCE

San José City College - San José, California [www](#)

- Major focus on the creation of digital content with a minor in journalism and politics.
